

Press Release (Zurich / Montano Lucino, March 09, 2021, 10:00am CET)

Partnership extends vision for yarn contamination detection

Loepfe Brothers Ltd. and Loptex SRL have today announced a distinguished strategic collaboration targeted at further improving yarn quality and productivity for spinning mills.

Both companies have a long track record of supporting spinning industry customers with latest technology to improve their performance and profitability. Today, this new collaboration brings Loepfe's YarnMaster Prisma and YarnMaster Zenit+ yarn clearers together with Loptex Exa and Centra sorters for a complete solution supplied by Loepfe.

This integrated offering combines the advantages of eliminating contamination at the opening stages of production with additional refinement of the yarn further down the line at the winding stage. The net result for spinning mills is production of the highest quality yarns while generating less waste, greater machine efficiency and less energy consumption.

Loptex CEO Renato Gerletti commented: *"We welcome this collaboration which harnesses the strengths of both the Loptex and Loepfe products for our customers. There are many synergies between the approaches of our two companies, not least of these being our dedication to using leading edge technology to deliver great results for spinning mills everywhere."*

Loepfe CEO Dr. Ralph Mennicke added: *"We are looking forward to working with the Loptex team. Next to our in-house R&D commitments, this is a complementary partnership that puts customer needs first and will deliver a vital combination of top quality and greater productivity to textile mills. As the industry emerges from one of the most difficult trading periods in living memory, we continue to be committed to rolling out new and innovative solutions over the months and years to come."*
