

We are a globally successful technology company based in the Zurich Oberland, which develops, produces and markets high-quality electronic systems for the textile industry. With our measuring and information systems we ensure the highest quality in the worldwide textile production. We employ around 140 people and are proud of our performance-oriented and collaborative working atmosphere.

We are looking for an experienced, self-sufficient person to join us immediately or on agreement as

Embedded Software Engineer C++

Your role

In a small team of software specialists and in intensive cooperation with electrical engineers, physicists and mechanical engineers, you will be involved in the development of software components for our latest product generations. You will ensure high quality and reliability through testing and participation in design and code reviews.

Your main duties include:

- Implementation and testing of software
- Concept, design and maintenance of the software architecture
- Setup and maintenance of development and test systems

Your profile

To be successful in your new job, you ideally offer the following skills and qualifications:

- Degree in Electrical or Computer Engineering ETH/Uni/FH
- Several years of practical experience in C++
- Experience with real-time operating systems
- Ability and willingness to quickly familiarize yourself with new technologies
- Good command of English; German is a plus

What to expect

We offer you a job with plenty of room to share and realize your own ideas. You can expect an exciting job in a dynamic and future-oriented environment with very experienced, committed and team-oriented colleagues. Both internally and externally, we offer excellent opportunities for further training. Our company is located in a modern building that offers very good working conditions. Further, the proximity to the recreational area of Pfäffikersee, good access via public transport and car, flexible working hours, five weeks of vacation plus time worked in advance for bridge days, and additional both monetary and non-monetary benefits.
