

We are a globally successful technology company based in Zurich Oberland. We develop, produce, sell and service high-quality sensor systems and solutions for the textile industry and adjacent application fields. Through providing our solutions, we help ensuring highest standards of yarn and textile quality worldwide. At our headquarter in Wetzikon, we employ around 130 people, and we are proud of our performance-oriented and collaborative working atmosphere.

We are looking for an experienced and self-motivated professional to join us as soon as possible in the role of a

UX/UI-Designer (m/w/d, 100%)

Your role

In this role, you will be a critical team member and responsible for defining the user experience of our products. You will work closely with product managers, and software engineers in an internationally distributed team setup.

Your main duties include:

- Work with development team, domain specialists and UX designers to define and implement designs.
- Develop, refine and translate user requirements into sketches, wireframes, mock-ups, interaction flows and, eventually, pixel-perfect designs.
- Perform user research and usability testing to refine user needs or requirements.
- Create simple and elegant solutions for complex tasks.
- Present concepts, designs, research feedbacks to senior stakeholders and team members.
- Assist other team members in product innovation.

Your profile

To be successful in your new job, you ideally offer the following skills and qualifications:

- BA/BS degree in Design, Human-Computer Interaction, other relevant disciplines, or 2 years of equivalent practical experience.
- Proficient in design tools such as Figma, InVision and/or Principle, or others.
- Analytical person that understands the real user workflows, abstracts, and concludes accordingly.
- Broad experience in user-centred design process, especially with iterative design, usability tests and delivery.
- Application of methods such as design thinking, value proposition canvas
- Experience in designing for mobile or other digital applications.
- Working knowledge in UI principles, heuristics, patterns, and technique.
- Experience in working with senior stakeholders and/or clients.
- Being committed to interdisciplinary and international collaboration and problem solving.
- Keen interest in emerging technologies.
- Excellent communication, presentation, and interpersonal skills.
- Willingness to travel approx. 10%
- Fluent in English, ideally German.

What to expect

We offer you a job with plenty of room to share and realize your own ideas. You can expect an exciting job in a dynamic and future-oriented environment with very experienced, committed and team-oriented colleagues. Both internally and externally, we offer excellent opportunities for further training. Our company is located in a modern building that offers very good working conditions. Further, the proximity to the recreational area of Pfäffikersee, good access via public transport and car, flexible working hours, possibility to work from home, five weeks of vacation plus good time worked in advance for bridge days, and additional both monetary and non-monetary benefits.
