

We are a globally successful technology company based in Zurich Oberland. We develop, produce, sell and service high-quality sensor systems and solutions for the textile industry and adjacent application fields. Through providing our solutions, we help ensuring highest standards of yarn and textile quality worldwide. At our headquarter in Wetzikon, we employ around 130 people, and we are proud of our performance-oriented and collaborative working atmosphere.

We are looking for an experienced and self-motivated professional to join us as soon as possible in the role of a

Software Test Engineer

Your role

As part of the software team, you will be responsible for the quality assurance of our software products. You will plan, coordinate, and perform tests together with our application engineers. The work is very versatile as our software covers a broad spectrum from small sensor to cloud solution.

Your main duties include:

- Test management
- Automation of software tests
- Testing of our software components
- Analysis of software problems
- Writing and maintaining small software tools to support the testing process

Your profile

To be successful in your new job, you ideally offer the following skills and qualifications:

- A degree in electrical or computer engineering ETH/Uni/FH
- Very good knowledge in software development with C#/.NET
- Knowledge in software testing and test automation
- Ability and willingness to quickly familiarize yourself with new technologies
- Good command of English; German is a plus

What to expect

We offer you a job with plenty of room to share and realize your own ideas. You can expect an exciting job in a dynamic and future-oriented environment with very experienced, committed and team-oriented colleagues. Both internally and externally, we offer excellent opportunities for further training. Our company is located in a modern building that offers very good working conditions. Further, the proximity to the recreational area of Pfäffikersee, good access via public transport and car, flexible working hours, five weeks of vacation plus time worked in advance for bridge days, and additional both monetary and non-monetary benefits.
