We are a globally successful technology company based in Zurich Oberland. We develop, produce, market and service high-quality sensor systems and solutions for the textile industry. With our measurement systems we ensure the highest quality in the worldwide textile production. We employ around 200 people in Switzerland, China, Taiwan, India, and Turkey.

Our people build solutions that inspire and transform technologies. That's why we invest in in bright minds, in their ideas, knowledge and development.

Join our team and play a key role in the development and implementation of our strategy. You will work with different teams and customers from all business units to realize the annual targets, drive initiatives and support the transformation. You will also support projects that improve our long-term performance, growth, competitiveness, and resilience.

We are now filling the following position in the **Research & Development division** at our headquarters in **Wetzikon/Zurich** at the earliest possible date:

Software Engineer (m/f/d) 100%

At Loepfe you will play a key role in driving the development of our software products for the textile market. Your active cooperation with your colleagues from product management, sensor development and customer service will make your role fun and very versatile. This position will require a high degree of creativity, flexibility, and reliability with the adoption of agile methodologies and tools in a complex product development environment where different stakeholders from the OEMs to the end users shape our products.

Your new role

In this challenging role your main activities will include:
- Development and maintenance of desktop and web applications
- Development and maintenance of CI/CD pipelines and infrastructure
- Software release management and testing
- Third-level support of software products
- Coordination of the development activities with our external development partners
- Collaboration with the product management for refining specifications and for conceiving new functionalities

Your skills

- 3+ years professional experience in backend (.NET and C#) and in frontend development (WPF and Angular)
- Expertise in agile software development and testing
- Very good analytical and problem-solving skills
- Strong communication and project management skills and the ability to gather and convey effectively complex information to all stakeholders
- A degree in software or electrical engineering (ETH/Uni/FH)
- Strong interest in developing products based on sensors systems and industrial computers
- Fluent in English both orally and written, knowledge of German is a plus

You can expect

- A future-oriented organization with an open, family-oriented corporate culture and an exciting working environment with highly experienced, committed and team-oriented colleagues
- Freedom to work independently with flat hierarchies and short decision-making paths, as well as opportunities to help shaping the company
- Comprehensive induction as well as varied tasks and fun in the team have a high priority
- Attractive overall package including 25 days annual vacation plus time worked in advance for bridge days, flexible working hours, home office days, above-average employment conditions and other employee benefits
- Modern building and infrastructure offer very pleasant working conditions
- Attractive location (recreational area of Lake Pfäffikon) as well as good access via public transport and car

Are you excited about this role?

We are looking forward to receiving your letter of motivation with your complete application documents (including references, diplomas, salary expectations and starting date), **exclusively in PDF** format, by e-mail to jobs@loepfe.com.
